### DETAILED ACTION

1. Claims 1-17 and 19-25 in condition for allowance.

2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose alone or in combination distinguishing an actuator force applied to a closure by an actuator and an acceleration force applied to a closure by an external acceleration and where at least one output distinguishes as actuator force applied to the closure by the actuator and acceleration force applied to the closure by an external acceleration as two separate values as disclosed in the claims and specification. Tanaka [931] uses two sensors, one to detect a pinch at the top portion of a window and one to detect a pinch at a sloped portion of the window and neither sensor output corresponds to an external acceleration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
